TAM applies for Part 21 Design Approval

Örebro, Sweden: Täby Air Maintenance, TAM, is seeking approval for a Part 21 Design Organisation, thus aiming to further enhance services to operators of the worldwide fleet of Saab 340 and Saab 2000 airliners. Plans call for a spring 2019 full design approval.

- We constantly strive to provide operators with a seamless service, and with full in-house design and production capabilities, we can provide all necessary engineering, design, production and certification services, says Pär Gulle, TAM Managing Director.
- Our current production approval covers the manufacture of a wide range of parts, including mechanical and structural parts for installation on aircraft.
- With an approved design organization, we will also be able to provide STC, minor design changes and minor repairs for large and small aircraft (CS-23, CS-25, CS-27) related to i.e. installation of avionics equipment, electrical systems, structure and cabin interiors, Pär Gulle summarizes TAM's plans.

About TAM:

TAM is a major, independent aircraft support and maintenance company, based in Örebro, 200 km west of Stockholm, Sweden. Having been in operation since 1989, TAM has over the years accumulated a vast experience in general support, maintenance and overhaul of small to medium sized airliners and freighters, with a focus on the Saab 340/Saab 2000 family of regional aircraft. Having all the necessary approvals, including EASA Part 145 and FAA Repair Station, TAM is ideally suited to support any operation with tailor-made maintenance and overhaul as well as having the leading Saab 340 cargo conversion programme.
